**Subject:** Manchester Valley and North Carroll High parking spaces

Lauren

According to our Construction Department, Manchester Valley has a total of 435 parking spaces (plus 24 Handicap Spaces) available during the school day. There are also 74 additional spaces in the bus area that can be used during after school activities.

I couldn't get a count for North Carroll High because we have added parking since it was originally constructed. However, I did a quick count (using Google Maps) of the spaces and came up with a total of 508 spaces (plus 10 handicap spaces) that are available during the school day. They also have the bus area which is available for parking during after school activities.

If you have any more questions just let me know.

Bill
